2. A preliminary review of the case reveals that although the entire sum of \$205,379.45 has been suspended, a considerable portion of the claim is supported by documentary evidence which appears susceptible to financial audit and certification in accordance with Agency regulation.

3. Based on this preliminary finding, the subject request and supporting documentation has been returned to the Finance Division for further analysis with instructions to process through normal channels all amounts which can be certified for charge to expense and to identify those specific charges which must be the subject of review by the Board.
